Belleville, May 26, 1876.

CANADIAN BIRDS.

THE EAGLES, HAWKS AND OWLS of Canada.

By HENRY G. VENNOR, F.G.S.

OF THE GEOLOGICAL SURVEY OF CANADA.

THIS is the first illustrated work which has yet appeared on Canadian Birds. It contains 30 large Plates of as many different birds, and the letter-press (100 pages) abounds in new and interesting facts relating to the habits, distribution and nesting of these, throughout the British possessions of America. Price, strongly bound in cloth, \$12.

N. R.—This price hardly suffices to cover the cost of the 30 plates alone.

Orders may be sent to

DAWSON BROS., Publishers, Montreal.

June 2.

GILBERT & MAY,

DENTISTS,

(SUCCESSORS TO DR. KELVEY.)

Nathan Jones' Block,

BELLEVILLE.

With all attention to their

Patent Atmospheric Suction Valves.

For retaining tanks that have become loose from imperfect perception of the gums. Dec. 6th, 1875.

Kerr's Thread

IS THE BEST.

QUALITY IS THE TRUE TEST.

Therefore KERR'S THREAD is now the favorite.

To be had at Foster, Barber & Brignall's.

## THE GREAT RUSH

To-DAY AT

## CHEAP JOHN'S,

Is the most Wonderful occurrence of the Day.

A Virginia Militia Training of the Day.

As a young and observant Yankee I was travelling in Western Virginia about a year ago, and happened to be present at a similar scene. They far surpassed the thousands of men that were to be seen at the annual muster of any State—Massachusetts and Vermont. I caught this late day, do perform more than sketch the outline of the performance, leaving the thousand and other grotesque comments to the imagination of the reader. They were indeed a grand sight.

The company had been warned to appear "dressed and equipped as the law directs," and a little before ten the afternoon Capt. Clapole gave directions for forming out by a big sergeant, whose lungs seemed to supply the service of the missing drum.

First, the company formed in a line, and then, by a big sergeant, whose lungs seemed to supply the service of the missing drum.

AT LESS THAN Wholesale Prices.

Foster, Barber &amp; Brignall's.

## THE GREAT RUSH

To-day AT

CHEAP JOHN'S,

Is the most Wonderful occurrence

of the Day.

A WONDERFUL BOAT.

The first light brought home from India

by the Prince of Wales is a golden boat,

more than a foot long and wonderfully en-

abled. The stern, supported by the legs,

wings and tail of a peacock, the lustrous

breast of the bird being carved into the

body of the boat with a perfect coloring

of flowers.

Work in colors, chips and charcoal

into the sails of your dingy, boats, and

will add greatly to the rich, bright coloring

of flowers.

Vines growing strongly should have their

lateral regularly pinched. Never allow

any unneeded wood to grow. The

strongly spent on superabundant shoots,

should be concentrated in what is left to

nature, of the wood also, in the fruit.

PHOTOGRAPH OF THE BOON.

The Paris Observatory has received from

M. Melander, a Swedish photographer, a

reusable photograph of the sun. He was

invented a process which enabled him

to obtain a picture showing nothing but

and volcanoes upon the surface of the orb,

and indicating forests of huge trees, now

petrified.

DEEP SEA SOUNDINGS.

The deepest Atlantic soundings ever

made were about ninety miles north of the

Island of St. Thomas in 3,875 fathoms.

The pressure was so great at this immense

depth that the bulbs of the thermo-

meter, made to stand a pressure of three

tons, broke.

A RIVER OF INK.

In Algeria there is a river of genuine

ink. It is formed by the union of two

streams, one coming from a region of fer-

ruginous soil and the other draining a peat

swamp. The water of the former is strong-

ly impregnated with iron, that of the lat-

ter with gallic acid. When the two streams

mix, the iron of the one unites with the

iron of the other, forming a true ink.

MARRIAGE TO SUCCEED.

A Burlington matrimonial list Sunday,

while investigating the cause and effect of

the poison of a wasp-sting, happily deter-

mined to make of himself a martyr to science,

and accordingly handed his thumb to an

impatient insect he had caged in a bottle.

The wasp entered into the matrimony

with a great deal of spirit, and backed up

to the thumb with an abruptness which

brought the scientist to his senses. He was

deeply absorbed in the study of remedies

that he forgot to make any notes of the

events of the day. When the morning came

he found his wife writing a paragraph in his

notebook, for he had been so busy that he

feared that the primary effect of a wasp-sting

is abrupt, blasphemous and terrific pro-

fusion, followed by an insupportable pain,

amounting to a mania, for ammonia, cam-

phor and raw brandy.

A CURIOUS FISH.

The Chinese petrelfish has the gills

disposed in a simple fan-like shape. It is

provided with an special apparatus for retain-

ing the eggs or young ones, and yet it

brings up about 200 young in the month

and kills. It is always the male that per-

forms these functions of incubation. After

the female has deposited the eggs in a dis-

position of the sand or between the tufts

of rocks, the male approaches and takes

them by inhalation into the cavity of his

mouth. From there some movement, the

mechanism of which we have not been able

to observe, sends them between the tentacles

of the gills. The pressure exerted on the

eggs by the branchial lamellae, suffices to

keep them in place. There, in the midst

of the organ of respiration, the eggs under-

go their metamorphoses. The young

ones grow rapidly and soon appear much

inconvenienced in their narrow prison.

They leave it, not by the gills but through

the opening by which the branchial cavity

communicates with the mouth. Here they

remain a great number of days, and then

another like the seed of a porcupine, the

animal's mouth becomes so distended

by the pressure of this numerous progeny

that actually the jaws cannot meet. The

checks are swollen and the animal presents

the strangest aspect. Some of the young

arrived at the perfect state, continue to

live in the gills. All have the head direct-

ed toward the local opening of the father,

the protecting cavity of which we have not

seen them leave even for a moment. Though

numerous, they hold their ground very

firmly, yet how they do so we have never

discovered. Neither can we understand

how the nursing father voids excrement,

his progeny; we are also ignorant at what

period of life the young ones leave the

pater and mother, to live independently.

The Plague in 1876.

A STATISTICAL RECORD FOR TEN YEARS—

THE APPEARANCE AND PROGRESS OF

THE PRESENT PLAGUE.

The Paris Academy of Medicine, says

Gazette of Medicine, has received a letter

from Dr. Thompson dated Tolosa May 25

on the state of the plague in Mesopotamia,

Arabia, and the adjoining countries. This

distinguished physician has been for the

last ten years keeping a statistical register

on the subject, from which we learn that

the plague broke out in those localities

and in Africa in the years 1867, 1871,

and 1874; it had nearly died out in 1875.

About the first of January of the present

year the plague reappeared in Mesopotamia.

It began in an Arab tent near Tigra, and

shortly afterwards its appearance at Hilary;

towards the end of February it reached

Kirkuk, and still travelling northward,

it arrived at Bagdad on the 10th of March.

To give an idea of its virulence there, from

the 11th to the 18th of April 516 cases and

313 deaths were reported, and from the

18th to the 25th there were 69 cases and 69

deaths per day. A further increase occur-

red in the first week of May, when the daily

average was 160 cases and 120 deaths.

From the 10th to the 20th it had decreased

to give an idea of its virulence there, from

the 11th to the 18th of April 516 cases and

313 deaths were reported, and from the

18th to the 25th there were 69 cases and 69

deaths per day. A further increase occur-

red in the first week of May, when the daily

average was 160 cases and 120 deaths.

Little Jim.

(By EDWARD FARMER, of Great Warfield,

shire, England.)

The cottage was a thatched one,

the inside and outside were

everything within that cot

was as neat and tidy as

The night was dark and stormy,

the wind was howling with

The death of her child!

It was a cruel and sudden

His eyes bright eyes gave him

They called him "Little Jim."

And oh! to see the bright

As she offered up a prayer—in thought—

She was afraid to speak.

Let her little waken one she loved

For she had a mother's heart,

And that poor mother's wife

With hands quivering, she kneels

Beside the suffering bed

And prays that her poor boy

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

And that he may be well

**IMMENSE DEMONSTRATIONS.**

**ARRIVAL OF THE CANADIAN**

**ORANGE DEPUTATION IN**

**DEIRY.**

The Londoner, *Sunday*, of the 11th,

contains the following notice of the arrival

of the Canadian delegates in Ireland:

"The representatives from Canada and the

United States of America to the Irish

meeting of the Grand Lodge, to be

held in Dublin, arrived in this city on the

evening of the 10th inst., per steamer

*Saratoga*, after a passage of nearly ten

days. They would have been most

only for the reception by the Grand

Newfoundland. The following gentlemen

constituted the party:

Genl. Colonel M. Bowell, M. P., W. G. M.

British America; J. H. W. M. G. M.

each day.

**Daily Intelligencer.**

BEVELLE, TUESDAY, JULY 25.

**Town and Vicinity.**

**THE ORANGE DELEGATES.**—On our first  
page will be found an account of the recep-  
tion of the Orange Delegates in Ireland.  
The reception was just what might have  
been expected from the warm-hearted  
people in Ireland, and the demonstrations  
on the 12th were magnificent and impos-  
ing.

**RECURRING.**—A large party of excursion-  
ists, from Pictou and Mill Point, at whose  
disposal the managers of the Orange Na-  
tional Company had placed the fine  
steamer *Orange Belle*, arrived here shortly  
before noon to-day. After an hour's stay  
they departed on their homeward journey,  
well pleased with the trip.

**IDENTITY SUSPECTED.**—It is supposed  
that the man whose drowning at St. John's  
on Wednesday last was noticed  
yesterday, was the individual calling him-  
self Martin H. Hayden, who escaped from  
custody in Prince Edward on the 6th inst.  
The description tallies exactly with that of  
"Hayden," but what his real name and  
residence were is unknown.

**ASSESSMENT.**—At the meeting of the  
Town Council last night the assessors were  
appointed to make the assessment of the  
town for 1877, their work to be com-  
pleted by the 20th of September. The gen-  
tlemen appointed were Messrs. Thos. Ruther-  
ford, John A. Northcott and P. P. Lynch.  
The making of the assessment at this time is an experiment, and  
it remains to be seen how it will succeed.

**FOSTER WARD.**—The seat in the Town  
Council which Mr. John B. Benson has held  
as one of the representatives of Foster  
Ward, was last night declared vacant, and  
the Mayor was requested to take the nec-  
essary action.

It does not seem at all probable that  
there will be a contest, the understanding be-  
ing that the undersigned, the Council not  
being at a very high premium at present.

**FIREMEN AT THE CENTENNIAL.**—Mr. W.  
H. Johnson, Chief of the Philadelphia De-  
partment, has written a letter to the Chief  
of the Quebec Brigade, in which he extends  
the following generous invitation to the  
firemen of the Dominion—"I extend to  
you all a hearty welcome to our City of  
Brotherly Love. The National Convention  
of Fire Engineers will meet in Philadelphia  
on the 4th of September next, and I ven-  
ture to say, it will be the largest and most  
interesting representation of Fire Chiefs  
ever brought together for a mutual inter-  
change of opinions and experience in re-  
lation to the extinguishment of fires,  
throughout the country, and on the 6th  
of September, there will be a general recep-  
tion of all visiting firemen; so I would ad-  
vise you to let the Canadian Chiefs visit us  
as they will be here during the week com-  
mencing September 4th; it will be in reality  
the Firemen's week of the Centennial year.  
Visit us by all means, Chief; the Expon-  
sition is a grand success and will be the  
most successful of the time, and don't forget to  
visit. I would request you to communicate  
this information to the Chiefs of your  
Dominion."

**THE VALUE OF A SCRAP BOOK.**—Every  
one who takes a newspaper which he in the  
least degree appreciates will not regret to  
see any one number thrown aside for waste  
paper which contains some interesting and  
important articles. A good way to preserve  
these is by the use of a scrap book. One  
who has never been accustomed thus to  
preserve short articles can hardly estimate  
the pleasure it affords to sit down and turn  
over the pleasant, familiar pages. Here a  
choice piece of poetry meets the eye, which  
you remember you were so glad to read in  
the paper, but which you would long have  
since lost had it not been for your scrap  
book. There is a witty anecdote—it does  
you good to laugh over it yet, though for  
the twentieth time. Next is a valuable  
receipt you had almost forgotten, and which  
you found just in time to save much  
perplexity. There is a sweet little story,  
the memory of which has cheered and en-  
couraged you many a time, when almost  
ready to despair under the pressure of life's  
care and trials. Indeed, you can hardly  
take up a single paper without re-perusing  
just glances over the sheet before you, and  
see how many valuable items it contains  
which would be of service to you in the  
years to come. A choice thought is far more  
precious to you than a bit of glittering gold.  
Hoard with care the precious gems, and see  
at the end of the year what a rich treasure  
you have accumulated.

**Nervous Headaches.**—How distressing is this complaint, with its  
constant throbbing, as difficult to cure as it  
seems to be. Often the ordinary remedies, in-  
cluding the use of the "Pain Expeller," afford  
no immediate relief, and in nearly all cases,  
if the directions are followed, will effect a  
complete cure.

this year in carrying off the Kellogg Cup—  
as they did in 1872 and 1873—has yet secured  
in distinguishing themselves and a galaxy  
of three thousand spectators.The Centennial Live Stock  
Display.It is officially announced by the Centennial  
Bureau of Agriculture that the live  
stock display will be held in the months of  
September, October and November, and  
that the periods devoted to each group  
will be as follows:—Group 29, horses,  
ponies, cattle, September 21 to 24;  
Group 31, sheep and goats, September 25  
to 28; Group 32, swine, from October 1 to 4;  
Group 33, dogs, from October 5 to 8; Group  
34, birds, from October 9 to 12; Group  
35, bees, from October 13 to 16; Group  
36, fish, from October 17 to 20; Group  
37, miscellaneous, from October 21 to 24.  
Entries will close on the 10th of August.  
The system of awards for live stock  
will be the same as that of the other  
departments of the exhibition. Bruce  
Lundreth, Chief of the Bureau of Agriculture,  
says that animals possessing points of  
excellence will be reported upon according  
to their inherent and comparative merits,  
and that exhibitors whose stock is recom-  
mended by the judges for an award will  
receive a special report and the diploma  
of the United States Centennial Commission.  
The judge in each class will also make a general report upon  
the development and present characteristics  
of each class, and the results will be made  
to animals of superior merit.STANLEY HEARD FROM—A cable tele-  
gram from London on the 20th inst. says  
that Stanley Heard, who was reported  
to have been killed in the attack on the  
fort at Fort Merv, has been received.  
After 24th, fifteen days' march from Jeddah.AN ADVENTUROUS VOYAGER.—The steamer  
"Greece," from Liverpool, reports that on  
July 19th, latitude 40, longitude 30, the  
small steamer "Brooklyn" was sighted,  
from Gloucester to Liverpool, with  
only one man on board, and wanted  
no assistance.GLENORA.—The nomination of candi-  
dates took place at Alexandria on the 24th.  
Mr. John McLennan being named on be-  
half of the Opposition, and Mr. J. C. Mc-  
Nabb as the Government candidate.  
There was a very large gathering of electo-  
rs, and addresses were delivered by the  
candidates. Mr. McLennan was supported  
by Messrs. Thorne, White and H. Cameron,  
M. P., and Messrs. Dr. Brown, M. P., and  
H. S. Macdonald spoke on behalf of Mr.  
McNabb.NOT SATISFIED.—The Ottawa Citizen  
says:—"Senator Brown is not satisfied.  
He has been caught at every point, his  
party has been defeated right and left."  
"Crack shots" of the entire Dominion, and  
that the six men who represented the  
at Oregano are not even in the running  
from the entire nation, but are all members of one  
company, the relative value of the score  
which they made in the international match  
can be judged of in comparison with that  
of the pick of the whole of Canada. Such  
a comparison redounds greatly to the credit  
of our local men, all of whom are residents  
of the County, showing that they are able  
to hold their own worthily against the  
"world in arms" with the regular prize  
upon their shoulders, we are far from saying  
that other battalions might not do as well,  
if some encouragement were afforded them  
by the Government. Thus, our encourage-  
ment should be looking to the regular prize,  
the stupid and illiberal policy of the  
Department in refusing to continue the  
issue of ammunition for target practice, or  
even to sell reliable ammunition to Volun-  
teers, acting as a great discouragement  
preventing many men who would take  
a frisky rank as marksmen from engaging in  
the practice at the targets necessary to de-  
velop their abilities with the rifle. Until  
the restriction complained of is removed,  
it is not only inconsistent for the Govern-  
ment to make grants to aid the sending of  
a representative Canadian twenty to Wim-  
bledon, but unfair to the country and un-  
just to the Force. It is unfair to the  
country, as not permitting a wider range  
for selection, and unjust to the Force in  
that there may be, and we have no hesita-  
tion in saying are, many men in the ranks  
capable of more ably sustaining their reputa-  
tion than can be obtained so long as tar-  
get practice is so expensive as it has been  
made by the miserable penny of the head  
of the Military Department. Let our  
rulers dismiss fifty or a hundred of their  
undesirable hangers on in and about the  
Departments, and apply the money thus saved  
to the encouragement, on a systematic plan,  
of target shooting amongst the Volunteers,  
and let them supplement this with a sum  
for the purchase of superior weapons for  
men who attain to a certain state of effi-  
ciency, and their policy will commend the  
support of the country. As it is, they have  
soured the hearty commendation of every  
man who is now in the ranks or who has  
been connected with the patriotic citizen soldiery  
of Canada.THE FINANCIAL SITUATION.—The St. John  
News finds some comfort in the financial situ-  
ation, by comparing the state of trade in Can-  
ada, with that in other countries. It says:  
"It is impossible even for this country to  
showers or foretell with exactness precisely  
the course of business affairs in Canada in the  
near future. But at present there is a  
very intelligent outlook that Canada has  
suffered and is suffering from the existing de-  
pression, but her prospects are not so gloomy  
as those of the United States. There is no  
doubt, perhaps, in the conclusion; yet people  
are apt to trouble not quite intubate to take  
comfort from the thought that things might  
be worse than they are."ANOTHER MURDER.—The Ottawa Citizen  
gives the following particulars of another  
shocking murder which took place a few  
days ago in the Gatineau. It seems that  
one day last week a man named Kelly, and  
a row with a neighbor named Hughes.  
Hot words followed, when Hughes picked  
up the blade of a moving machine, and  
struck him several times over the head.  
From the very first blow the victim fell  
from his recovery, the wounds being of such  
an extensive character. He died a few  
hours after. Kelly is a married man, and  
has a family of five small children.Sore Eyes.—The late Dr. Brainerd, of Chicago, gave  
it as his opinion, that fully one fourth  
of the entire population was afflicted with  
sore eyes. He said that he had seen many  
remedies, and said that if the blood  
was not purified, the disease would be very  
rarely met with. One remedy was the  
"Purifier."

tised by the Khedive on the Italian Central  
African expedition.—A branch line of railway from Chatham,  
Northumberland county, N. B., to the  
mouth of the International was opened on Mon-  
day.—A cash box with \$1,000 worth of diamonds,  
etc., in it, was discovered in possession of  
a Boston man, who is now in jail.—Some handsome new telegraph instru-  
ments for the Canada Pacific line have been  
received from Chicago.

—The telegraph office in Winnipeg.

—The Sunday School Parliament will close  
on Wednesday, but the Thousand Island Park  
will be occupied until September. The grand  
concerting takes place on the 10th of Aug.—Private telegrams from Constantinople  
show a suffering from cholera, etc.—The Sultan's brother has been sent to  
the war, in order to induce the Sultan to  
postpone his intended abdication.—A fishing schooner at Cape Elizabeth,  
Me., took in 100 tons of fish last night.—The 500 barrels of mackerel, she could only  
hold 300 barrels, and had to give the other  
six hundred away.—The Nova Scotia Government has award-  
ed the contract for the construction of a railway  
from New Glasgow, through Pictou and  
with a steam ferry across to Cape Breton.—There was coined in the San Francisco  
mint during the year ending June 30, \$35,  
890,000, of which \$27,033,000 was in gold  
coin. The balance annual coined of  
any mint in the United States.

For the Belleville Intelligencer.

Homeward Bound.

DEAR SIR.—There are so many of our  
friends in Belleville and Tweed who desired  
me to write a letter detailing our jour-  
ney, that I have been obliged to write one  
to each individual, so if you will per-  
mit me I will write them all at the same  
time through your columns.Leaving Belleville on the 9th June, by  
steamer "Albatross," with hearts aching at  
parting with so many friends, we steamed  
down the beautiful Bay of Quinte. Reaching  
on Kingston at 6 o'clock, we were met by  
our friends, and after a short stay, we  
aboard and visited our old acquaintances, Mr.  
Toed and family. Bidding them good bye  
we returned to our quarters on board the  
steamer. Leaving Kingston at 9 o'clock  
we went on our journey through the Thousand  
Islands, reaching Prescott at 4 o'clock on  
Tuesday morning. Leaving there we crossed  
the river to Ogdensburg, where the "Albatross"  
took in 1,000 bbls. flour and other freight.  
While this was being done, several of us  
passed a stroll through the streets of  
the city, but did not proceed far before  
Brother Jackson began to cry into my ear  
by asking us questions which we answered  
to please ourselves. After a long walk we  
returned to our boat and proceeded on our  
course down the magnificent river of Law-  
rence. In conversation with Capt. Carroll  
of Belleville, who is master on the "Al-  
batross," about the shipment of so large  
an amount of flour to Montreal, from  
Ogdensburg, he told me that they shipped  
large quantities from that port to Montreal.  
I wanted to know how it was that the  
Americans could buy Canadian flour, and  
he told me that it was because the Ameri-  
cans were so much in the habit of buying  
that did not satisfy me, believing that the  
real cause was something wrong in regard to  
the shipment of flour from Ogdensburg.  
I asked him to explain this, instead of car-  
rying out such a strong party spirit in political  
matters. He said, Mr. Editor, I am run-  
ning from my subject, but I will tell you  
the same time. While staying at a landing  
place just below the rapids to take in wood,  
the steamer "Albatross" was met by  
Don Pedro on board, and a large party  
of excursionists which made quite a stir in  
the city. We arrived in Montreal very early  
on Wednesday morning, put up at the  
Albion Hotel, took a ride around the mountain  
and viewed the city with its surron-  
ding scenery. So many friends were there  
spread out to view could not be seen on  
the continent of America. Finding that the  
steamer "Albatross" had been

 For Vancouver—Daily, at 2 p. m.

The ships arrive in Belleville about noon each day.

## Daily Intelligencer.

Belleville, Thursday, July 27.

## Town and Vicinity.

Pic-Nic.—The annual picnic of Christ Church Sabbath School took place to-day.

THIS EVENING.—Remember the festival in the Congregational Church this evening.

COMPLETED.—The new light house erected by the Dominion Government at Weller's Bay have been completed.

GRASSHOPPERS.—We are informed that grasshoppers have done a good deal of damage to the crops in the back townships of this county.

PERSONAL.—Mr. A. L. E. Croter, of the Philadelphia Institution for the Deaf and Dumb, is passing a part of his holidays in visiting his relatives in this vicinity.

AN ADDITION.—Messrs. Robb & Son have just completed a brick factory at Mill Point, which cost \$5,000. It is a valuable addition to the buildings of the village.

DEPRAVED.—We learn that the By-law in aid of the Grand Junction Railway, which was voted on at the Township of Albany yesterday, was probably defeated, though details have not yet been received.

CHESS MARKET.—The Express says that Colborne has become the shipping point for chess manufactured between Belleville and Cobourg. Last week 928 packages were purchased there at the low figure of 84 cents per lb.

PRESENTATION.—At Cobourg yesterday Sir John Macdonald was presented with an address by the Liberal Conservative Association of that town. Sir John in reply spoke for an hour, and Hon. W. McDougall and Hon. James Cockburn also delivered short addresses.

MOON PREDICTIONS.—Mr. H. J. Vennor, who attended yesterday as a witness, prophesied last winter, a profuse frost weather for July and August and summer weather for September. The "riddle is already read" to a certain extent, but further developments will be awaited with interest.

THE COLBORNE DEMONSTRATION.—A large number of residents of the town took the special train this morning for Colborne, whither they go to attend the great Conservative demonstration, at which Sir J. Macdonald, Hon. James Cockburn and other prominent members of the party were to address the assembled thousands.

FOR THE "OLD COUNTRY".—Mr. Wm. White, Deputy Reeve of the Township of Hungerford, left town by the mid-day express to-day for Quebec, whence he will sail, per Allan steamship on Saturday, for England and subsequently he will cross the channel to England. We add the customary good-wishes of a pleasant voyage and a safe return.

CONSERVATIVE PIC-NIC.—We are requested to announce that the Conservatives of West Wellington will hold a picnic at Foxton on August 3th, at noon. Sir J. Macdonald, Dr. Tupper, Hon. M. C. Cameron, T. N. Gibbs and W. McDougall, and Mr. Thos. White are expected to deliver addresses. Railway fares have been placed at low rates.

CAIROSTRO SPRINGS.—Dr. Lister, who has been enjoying the waters of the Springs for some weeks, has returned for a temporary stay in town, and reports his health vastly improved by the use of the waters, which he states are a certain cure for Rheumatism. As the Springs are with in easy distance, they ought to become popular with rheumatic patients, especially as the hotel accommodation is excellent.

THE BELLEVILLE YACHTS.—The "Steamer News" of the 26th says:—"The steamer 'Hector' on her trip down yesterday, passed three Belleville yachts on their way down to sail in the yacht race at St. George's picnic to-day." Doubtless these are our contemporary has learned the incoherence of the information, as none of the Belleville yachts owners had any intention of entering their boats in the Kingston race. We have heard of people under certain influences seeing two objects where only one exists, but this fact of the person on the 'Hector' whose vision revealed to him three Belleville yachts where none were to be seen, is wonderful indeed and without parallel.

SWIMMING.—We notice, by our swimming, that the most useful art of swimming is receiving a considerable amount of attention in Toronto, a Club for instruction in the art having been formed in that city. Considering the number of lives lost annually from ignorance of "how to swim," it seems astonishing that no similar efforts have not been made to promote a more general diffusion of the necessary knowledge. Females especially ought to be taught to swim, and we hope to see that their instruction in hand swimming schools for males and females are necessary, and it is to be hoped that

Belgrade, July 27.—A disguised Turk has been arrested at Glad. It is supposed he intended to poison wells in Serbia.

Constantinople, July 27.—Considerable excitement exists in Crete, Greece and Roumania. The Turks are expected to start the war will not be localized, and expect hostilities with Russia.

Lombard, July 27.—A meeting of representatives of 27 firms held at New Church, Lancashire, resolved that it was desirable in the present depressed state of the cotton trade, to work the mills only four days in the week.

Paris, July 27.—The Government magazine at Toulouse has blown up. There was the great loss of life.

Vienna, July 27.—The municipal authorities throughout Austria have been instructed to prepare for the mobilization of the army.

Russia, July 27.—The whereabouts of the Prince of Montenegro are unknown either at Mostar or there.

It is believed that the battle a few days since at Banowa, where 5,000 Montenegrins attacked the Turkish post and were repulsed with heavy loss, was fought to check the withdrawal of the main Montenegrin army.

The Turkish commander at Klek has asked for three days' armistice which has been granted. The honors of war, but the offer was refused.

Berlin, July 27.—The Democratic Society of Frankfurt on the Main, presented on the 4th of July an address in honor of the Centennial to the American Consul, strongly reflecting upon monarchical institutions. The Consul refused to accept the address, and the Society thereupon complained to the American Minister, Baron von Driemel, who replied that it was inadvisable for the American representative to receive such an address.

London, July 27.—The party politics of the Turkish empire are making to make the whole army.

The Telegraph's Vienna special says it is that the Turkish Ambassador here has been denied the honor of a visit, as he has been granted the honors of war, but the offer was refused.

Belgrade, July 27.—The Democratic Society of Frankfurt on the Main, presented on the 4th of July an address in honor of the Centennial to the American Consul, strongly reflecting upon monarchical institutions. The Consul refused to accept the address, and the Society thereupon complained to the American Minister, Baron von Driemel, who replied that it was inadvisable for the American representative to receive such an address.

BELLEVILLE, MONDAY, JULY 31.

THOSE STEEL RAILS.

The Montreal Gazette says, "A leading

ten circular draft on July 15, 1876,

steel rails at \$27 10, to \$28 per ton, the

market was still dropping. The circular

also states that there are for sale large quantities of Bessemer steel rails, quite new and

perfect in condition, at prices very moderate

and prices are asked. Taking even \$28 as

the present market price, it is equivalent

at the present rate of exchange to about \$29.

For the 50,000 tons purchased by Mr. Mac-

Kenzie, acting on behalf of the Govern-

ment, \$24 per ton was paid. The actual

cost to the country is therefore about \$20,

000, in addition to which there is loss of

interest on the money expended and li-

ability of the rails to depreciation from

actual exposure. The bulk of the rails

purchased by Mr. MacKenzie is still un-

used."

Supposing, therefore, that Mr. Mac-

Kenzie was guileless of the charge brought

against him of corruptly favoring the in-

terests of his brother, had he had an intimate

connection, his lack of foresight has result-

ed in adding upon the country a loss of

upwards of one million of dollars, that is

adding interest on the money permanently

expended, to the direct loss on the trans-

action. Such "mixing and muddling"

may suit the Reform palate, but people in

general will think that such a course is

rather more of a luxury than Canada

can afford at the present time, espe-

cially when to this costly transaction the

minister adds an extravagant expenditure

of the public funds in the same service.

The country, and general management

of our affairs.

THE OCEAN YACHT RACE.

The New York Herald gives the follow-

ing account of the start in the ocean yacht

race for the Bennett cup, which will be

seen, differs materially from that for-

warded by telegraph, and affords an intelligible

idea of the tactics of the sailing masters

of the competing craft:

"The start of the race was blowing a good

whole sail breeze from the south-east. When

the whistle blew the Contessa of Dufferin, Wan-

der and Lila were standing in towards the

Jersey shore on the starboard tack, in the order

of the race. The Tidal Wave was standing in on

the same tack some way to the windward of the

others. The American vessel was standing in

to windward, just below the mark.

As the gun was fired, the signal

which gave them permission to start, and at the

times they were all heading for the mark, except

the American vessel, which was heading for the

line in second place.

The pretty Lila was the first to reach the

mark, and at 12 m. she dashed over the

line and commenced the race. She was under

working canvas, reaching the mark in first

place, flying jib and jib top, and as she

dashed through the water she looked every way

a winner. The American was the next to cross

the line, and she was the same as the

winner. The Contessa of Dufferin was

carrying the same sails. The Wanderer

came next, and she was the same as the

winner. The Tidal Wave, under working top-

sail and flying jib, but she was moving through

the water in a lively race, and she was

her own. Next came the Canadian yacht

Contessa of Dufferin, flying jib and jib

top, and she was the same as the

winner. The Wanderer came next, and she

was the same as the winner. The Tidal

Wave, under working top-sail and flying

jib, but she was moving through the water

in a lively race, and she was her own.

Next came the Canadian yacht Contessa

of Dufferin, flying jib and jib top, and she

was the same as the winner. The Wan-

derer came next, and she was the same

as the winner. The Tidal Wave, under

working top-sail and flying jib, but she

was moving through the water in a lively

race, and she was her own. Next came

the Canadian yacht Contessa of Dufferin,

flying jib and jib top, and she was the

same as the winner. The Wanderer

came next, and she was the same as the

winner. The Tidal Wave, under working

top-sail and flying jib, but she was moving

through the water in a lively race, and

she was her own. Next came the Cana-

dian yacht Contessa of Dufferin, flying

A German Paper published in

Stratford,

called the *Kolonist*, notable for its Reform

proclivities, is not so blind, according to

the *Stratford Herald*, as the generalizing

to Reform, but it is not so that it is

more honest. However this may be, it is

not backward in giving expression to its

honest convictions as to the significance

of the result of the election. The *Kolonist*

says in its issue of the 29th inst. that the

Government is distasteful to the

country, and frankly admits that a general

election at the present moment would re-

sult in a crushing defeat for the Reform

party. The *Herald* gives the following

translation:

"The reason for the result of the elec-

tion being unfavorable to the present ministry

is the fact that the Government has con-

verted the law into a mere political de-

vice, and a second, the fact that it has

denied the law. The Government is in fact

a political (unconstitutional) party, and it is

in the position of the party that in case

of a general election taking place, the Re-

form party would suffer a decided defeat."

A Singular Accident.

At the National Rifle Association

at Wimbledon, England, on Thursday, July

13, an incident worthy of a place in the

history of the world took place. The sun

was shining brightly. The rays of the sun

appeared, being playing on the surface of

a small mirror hanging in one of the bill

in the regimental line. The incident is so

strikingly in the politics of the day that in

case of a general election taking place, the

Reform party would suffer a decided defeat."

Dominion Appointments.

The Canada Gazette of the 29th contains

the following appointments:

Geo. E. Cain, Yarmouth, N. S., to be

Harbor Master of that port.

N. Bourassa, St. John's, to be Harbor

Master of that port.

John Gustave Norris, Victoria, B. C.,

to be a Sub-Collector of Customs.

Joseph Warren, Pembroke, to be a Sub-

Collector of Customs at that place.

Chas. B. M. Sewell, of Hamilton, to be

Surveyor and Measurer of Shipping of that

port.

Joseph Clorin, St. Hyacinthe, Q., to be

Collector of Customs.

The Crops.

The Hamilton Spectator thus summarizes

the condition of the crops in the country

west of that city:

Fall wheat, good crop but seriously in-

jured in many places by the midges.

Peas, an excellent crop.

Barley, an average crop.

Oats, below the average, and in some

places eaten by grasshoppers.

Spring wheat, inferior, but not much

sown.

The corn crop promises well, but the

turnips have been much injured by the

fly, and potatoes, in some places, by the

Colorado beetle.

The grasshoppers have entirely destroyed

the young clover crop in some places.

Western corn looks well, but does not

appear to be so good as some years ago.

The hay crop is exceedingly heavy—the

largest crop in fact that has been cut for

many years. Some farmers have cut their

hay, giving one-third for the cutting

and saving of the hay.

The apple crop is a very small one.

A farmer who has 400 trees says he will

not pick thirty bushels of them all. A reason

for this is given in the changeable weather

of last winter—warm weather and rains for

a week, followed by severe frosts.

News Continued.

—Count Van Armin, son of the eminent

Ambassador, is in Montreal.

—John Leeming, the well-known Auctioneer

of Montreal, died on the 29th inst., aged 69.

—The body of a man named James Maher,

was found in the canal, Montreal, on the 29th

inst. It is supposed to be that of a man.

—The Buffalo City Cadets, a military or-

ganization, visited Toronto on the 29th inst.

—The weevil is committing great ravages

on the wheat in the vicinity of Kingston.

—Caterpillars are eating up the Kansas

wheat fields.

—Authorized custom on American in-

voiced goods is to be reduced from 25

per cent to 10 per cent.

—The salaries of clerks on the U. S. rail-

way postal service are to be reduced seven

per cent.

—A letter received by Mr. McMillan, on

Friday from Winnipeg, states that an im-

mense cloud of grasshoppers are passing over

that city.

—A Turkish bath can now be obtained at

the nominal cost of digging six hills of pota-

toes.

—During the last six weeks 100 workmen

have been employed in the Montreal ship-

yard.

—The creditors of Kinnaird &amp; Co., Mont-

real, will allow the insolvents to carry on

business under supervision.

—Hon. Mr. Stanley, brother of Lord Stan-

ley, of Alderley, and lady, are guests of His

Excellency Earl Carnarvon, at Beacon Hill.

—Yesterday the steamer *Manitowag* brought

1,341 steerage and 90 cabin passengers to

Quebec.

—A telegram that Gen. Crook's command

has been ordered to pieces is without foundation,

in fact the reverse has been received.

—A lay granting a bonus of \$90,000 to

the Huron and Quebec Railway was carried

in the last meeting of the legislature.

—Julia Currie, a young woman of Toronto

city, died on Friday from injuries inflicted on

her person by her own hand in the procure-

ment of a miscarriage.

—A fire in Millbury Mass., on the 30th

inst., destroyed property amounting to \$100,-

000.

—The Ontario Government have in con-

templation the appointment of a Medical In-

spector of Asylums. The idea is to relieve

Mr. Langmuir, whose duties have become

very arduous.

—A most disgraceful price fight occurred

Queen's Park, Toronto, early on the morn-

ing of the 29th. Between two men—McDonald,

Applied Science.

EXAMINED ON PRINCE AND GERMAN

SEWER. The addition of enamel to brass

perfectly effected by first engraving or

pressing the design to be enameled into the

metal, and then coating the engraved surface

with the depressed design, galvanically

depositing the enamel on the surface, and

on this surface in usual and easy way, be

enamel, or silver, or treated in any usual

way.

CHEAP QUININE. It is reported that the

extensive medicinal plantations in British

Sikhim have been effected to furnish an

artificial quinine salt at a cheap rate.

The resident manager of the plantation at

Darjeeling writes to Dr. Hooker that they

expect to collect about 60 tons of the drug

dark during this season, as the

making from the spots is a favorite, which

they are making from 40 to 50 percent.

They are making from 40 to 50 percent.

and hope to sell at about 50 cents an ounce.

PREVENTION OF BOILER INCURSIONS.

Le Sueur proposes the use of metallic

as a preventive of boiler incursions.

Twenty kilograms, introduced into a boiler

of 100 horse power is sufficient for at least

three months. The zinc disappears, and

whatever is deposited from the water forms

no crust, but only a loose mass, which can

be easily washed out. The zinc is not

not yet explained, but M. Le Sueur supposes

electricity plays a part in the process.

He has also invented a device for the

direction of the electric current on the

reflex medullary action, and the employ-

ment of electricity as a disinfectant.

He inquires also into the difference

of intermittent and of continuous currents

upon the economy.

BRONZING IRON CASTINGS.—A process

for bronzing iron castings, patented in

different countries by Gaudin, Mignot and

Bouard, differs from preceding ones in dis-

posing the casting in a solution of a third

of the film of copper so adherent, that it will

not scale off, but in some cases the iron and

copper have been found to scale off.

The film is also said to be perfectly uniform

in thickness upon the elevations and de-

pressions, and on the under and over

surfaces, in the hands of a skilled work-

man, of acquiring a close resemblance to

bronze. The process has been patented

at Val d'Aoste, on castings of all sizes

up to colossal statues, some of which have

withstood the weather for a summer and

two winters without the least injury. The

cost is not more than double that by the

usual process. A similar method may also

be employed for tinning copper and cast-

iron vessels.

NATURAL DEVELOPMENT OF SULPHURET

HYDROGEN.—Faulquier narrates a curi-

ous phenomenon which has taken place

during the summer of 1875 at Palavas, near

Montpellier. In the vicinity of this place

are extensive salt marshes, which, in consequence

of persistent north winds, are almost

permanently dried up. The accom-

panying heat of the season has produced a

rapid decomposition of the organic matter

# GENTLEMEN!

See the newest thing in Courts,

THE WASHING "BOND STREET,"

JUST IMPORTED,

And very low in price.

J. & J. W. JOHNSON.

"FOLLOW JESUS,"

BY ASKED OF GOD.

BY ANNA SHIFTON,

For sale at the Willard Trust Repository,

W. H. Vassall's Store, Bridge St.

House to Let.

A CONVENIENT HOUSE, Eight Rooms,

on South side, Mayors Street, Taylors

most reasonable. Apply at 51-41.

Belleville, June 30, 1876.
